

Advanced Tomcat Administration

Overview

This 2-day, intensive instructor-led Advanced Tomcat Administration training offers a deep dive into the Tomcat technology. It shows typical challenges in advanced configurations. Different configurations for resources such as Valves, Data Access JMS or Security are covered. Also high availability and fail over using Tomcat's clustering mechanism are explained.

The training covers the integration of Tomcat with Apache Https and also shows you how Tomcat installations can be tuned and how to trouble shoot them.

Training Objectives

At the end of the training, you should gain an understanding of Tomcat and be able to:

- Use Tomcat's advanced configuration options
- Scale out, trouble shoot and fine tune

Target Audience

Administrators interested in advanced Tomcat configurations

Prerequisites

- Basic system administration capabilities
- Good understanding of Apache Tomcat fundamentals

Pricing and Scope

- Two (2) days of instructor-led, classroom training
- 50% lecture and 50% hands-on lab
- Individual enrollment available at convenient locations worldwide:
<http://www.springsource.com/training/curriculum>
- Contact your VMware representative for pricing information
- Onsite training available for companies that want the benefits of instructor-led classes without travel
- Contact VMware Education to discuss facility requirements for onsite training at education@vmware.com

Training Outline

Day 1: Advanced Tomcat

- Advanced configuration options in Tomcat
- Custom deployments
- Configuring Valves
- Data access pools
- JMS Brokers
- Security Realms
- Custom builds from Tomcat source
- High Availability and Fail Over
- Clustering mechanisms and configuration options (e.g. session replication)

Day 2: Scaling out web environments, Troubleshooting and Tuning

- Best practice deployments for Tomcat with complementary technologies
- Integration options between Apache Httpd and Apache Tomcat for clustering, high availability, fail over and load balancing
- Optimizing Httpd/Tomcat deployment
- Tips and tricks to troubleshoot and tune Tomcat installations

About VMware Professional Services

VMware Professional Services helps IT departments in companies of all sizes accelerate time to market, reduce deployment risk and maximize ROI as they adopt virtualization. VMware Professional Services and its extensive partner ecosystem comprises experienced IT professionals who provide consulting, technical account management, integration and deployment services, and education services for VMware products and solutions. As the largest services organization focused solely on virtualization, our consultants have in-depth expertise and use proven, repeatable delivery methodologies that have helped thousands of customers energize IT while saving energy—financial, human and the earth's—through virtualization.

For More Information

More information about VMware software and services is available from <http://www.vmware.com> and from your local VMware representative.
