

VMware vSphere: Manage Availability

Overview

This hands-on training course equips system administrators with the knowledge, skills, and abilities to achieve competence in building and running a highly available VMware® vSphere™ 4 virtual infrastructure.

Course Objectives

At the end of the course, you should be able to understand the functionality in vSphere and be able to:

- List the components of business continuity
- Describe Microsoft Windows 2003 and 2008 cluster configurations
- Configure a VMware High Availability (HA) cluster using nondefault options
- Deploy fault-tolerant virtual machines using VMware Fault Tolerance (FT)
- Deploy VMware vCenter™ Server Heartbeat

Target Audience

System administrators, systems engineers, and solutions architects who need the knowledge, skills, and abilities to ensure the availability of their existing vSphere deployments

Prerequisites

Completion of the VMware vSphere 4: Install, Configure, Manage course or the VMware vSphere 4: What's New course, or have prior experience using VMware ESX™/ESXi and vCenter products

Pricing and Scope

- One (1) day of instructor-led, classroom training
