

# Tomcat Administration Fundamentals

## Overview

This 2-day, intensive instructor-led Apache Tomcat Administration Fundamentals training offers a thorough step-by-step-walk through of the fundamentals of how to administer the popular standards-based Apache Tomcat application server.

It starts with the basic Apache Tomcat install and general configuration, and continues through to advanced deployment strategies. Each module is taught with accompanying lab exercises, providing hands-on experience throughout the course.

This training emphasizes best practices, how to utilize Apache Tomcat in large scale deployments, application deployment strategies, software provisioning and the fundamentals of Apache Tomcat configuration.

This interactive training is geared towards Systems Administrators interested in installing, configuring and monitoring their Web infrastructure as well as System Integrators deploying Apache Tomcat in enterprise environments.

Students who have completed this training should enroll next in Advanced Tomcat Administration Training. These trainings can also be combined into a four- day Tomcat training.

## Course Objectives

At the end of the training, you should gain an understanding of Tomcat and be able to:

- Install and configure Tomcat
- Choose and implement strategies for application deployments

## Target Audience

Administrators interested in Tomcat

## Prerequisites

Basic system administration capabilities

## Pricing and Scope

- Two (2) days of instructor-led classroom training
- Individual enrollment available at convenient locations worldwide: <http://www.springsource.com/training/curriculum>
- Contact your VMware representative for pricing information
- Onsite training available for companies that want the benefits of instructor-led classes without travel
- Contact VMware Education to discuss facility requirements for onsite training at [education@vmware.com](mailto:education@vmware.com)

## Course Outline

### Day 1: Getting Started with Tomcat

- Overview of Tomcat and the Apache Software Foundation
- Understand the different versions and the release process
- Tomcat download and install
- Installation and management for large scale deployments.
- HTTP protocol and its support in Tomcat

### Day 2: Configuration and application deployment

- Standard JSP and Servlet web applications
- Configuration and execution of applications within Tomcat
- Advanced configuration options
- How to optimize Tomcat for optimal performance

## About VMware Professional Services

VMware Professional Services helps IT departments in companies of all sizes accelerate time to market, reduce deployment risk and maximize ROI as they adopt virtualization. VMware Professional Services and its extensive partner ecosystem comprises experienced IT professionals who provide consulting, technical account management, integration and deployment services, and education services for VMware products and solutions. As the largest services organization focused solely on virtualization, our consultants have in-depth expertise and use proven, repeatable delivery methodologies that have helped thousands of customers energize IT while saving energy—financial, human and the earth's—through virtualization.

## For More Information

More information about VMware software and services is available from <http://www.vmware.com> and from your local VMware representative.
